DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 8, 10 and 12, drawn to method and apparatus for laser cooling of atoms for laser cooling atoms each involving a plurality of magnetic subsidiary levels as its cooling lower level being in a ground state in energy level, classified in class 250, subclass 251.
- II. Claims 9 and 11, drawn to a coherent light source used for laser cooling of atoms, classified in class 372, subclass 18.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. The claims 1 – 8, 10 and 12, teaching a method and apparatus for laser cooling of atoms for laser cooling atoms each involving a plurality of magnetic subsidiary levels as its cooling lower level being in a ground state in energy level and claims 9 and 11, teaching a coherent light source used for laser cooling of atoms. In this case is a two different inventions are total mind, which there is to make two different searches, in different arts.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and Group III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
